PROFESSIONAL SUMMARY

Motivated AI & ML enthusiast with hands-on experience in Generative AI, RAG pipelines, LLM applications, and intelligent automation systems. Skilled in building AI-driven applications using Python, FastAPI, LangChain, and modern frameworks with exposure to Selenium-based automation testing concepts. Passionate about developing scalable, real-world technology solutions through continuous learning and innovation.

EDUCATION

B.E. Computer Science and Engineering (AI & ML) 2023 – 2027
Honours in Cybersecurity and Data Privacy (Pursuing) CGPA: 8.72
Rathinam Technical Campus, Coimbatore

TECHNICAL SKILLS

Programming: Python, Java, SQL
AI / Machine Learning: Machine Learning, Deep Learning, CNNs, NLP Basics, LLMs, RAG Pipelines
Generative AI & Automation: Prompt Engineering, LangChain, Vector Databases, AI Workflow Concepts
Testing & Automation: Selenium WebDriver, XPath, CSS Selectors, Test Automation Basics
Frameworks & Technologies: FastAPI, REST APIs, OpenCV, Streamlit
Cloud & Tools: AWS (EC2, S3, Lambda), Git/GitHub, MongoDB, Jupyter Notebook, Eclipse IDE

PROJECTS

Cura AI – Smart Complaint Management System (RAG + LLM) 🌐

- Built a full-stack AI-driven complaint management system using React and FastAPI
- Implemented a RAG-based workflow for intelligent complaint analysis, classification, and response handling
- Integrated Twilio API for real-time alerts and designed a dashboard for complaint tracking and resolution

Used Car Price Prediction (Machine Learning)

- Developed a machine learning model for predicting used car prices using regression techniques
- Performed data preprocessing, feature engineering, and outlier handling for improved model performance
- Deployed the trained model using Streamlit for interactive real-time predictions

PizzaBot – Dialogflow Chatbot (NLP + Conversational AI)

- Designed a conversational chatbot using Google Dialogflow for automated pizza ordering workflows
- Implemented intents, entities, and conversational flows for smooth user interaction
- Integrated basic NLP concepts for intent recognition and response handling

Potato Disease Detection (CNN + Computer Vision)

- Built a CNN-based model for potato leaf disease classification
- Performed image preprocessing and model training for improved prediction accuracy
- Deployed the model using Streamlit for real-time predictions

INTERNSHIP

AI & Machine Learning Intern 04/2025 – 05/2025
NoviTech R&D Private Limited Coimbatore
Worked on AI/ML development and real-world workflows

CERTIFICATIONS

- Oracle Cloud Infrastructure Gen AI Professional
- Google Cybersecurity Professional
- AWS Machine Learning Foundations
- AWS Machine Learning for NLP

LANGUAGE

- English
- Tamil (Native)
